Solutions For All Four Walls

# Vertical Learning Solutions

Evidence-based Wall Systems for K-12 Environments

Platinum   
VISUAL SOLUTIONS

# Designing for Visual Acuity & Cognitive Clarity

## Evidence-Based Wall Solutions for Learning Environments

P360 Wall Solutions by Platinum empowers architects and designers with evidence-based strategies that transform classroom walls into dynamic learning tools.

Each system is designed to support HSW (Health, Safety, and Welfare) criteria—enhancing visual comfort, cognitive engagement, and emotional well-being through purposeful design.

## Design Considerations that Matter

### Visual Acuity

Ensuring every student, regardless of where they sit, can see clearly.

### Contrast & Clarity

Using colors and topography that engage, not overwhelm.

### Reducing Wall Clutter

Cutting down on visual noise to create focused, interactive learning spaces.

### Acoustics

Optimizing the sound environment for better learning.

### Safety & Engagement

Creating open, interactive environments that foster collaboration & engagement.

# Design Collaboration with Purpose

## Evidence-based Vertical Learning Solutions

Every learning environment is unique. Our collaborative process helps architects and designers evaluate the visual, acoustic, and spatial needs of each space to determine which P360 wall solution — IDEAtion, EDTech, Jobs, or Window Wall — will deliver the best performance.

We begin by understanding the context of the classroom — how it looks, feels, and functions — so that each wall solution enhances visibility, clarity, and engagement. Grounded in evidence-based design and aligned with HSW principles, our approach ensures every wall performs with purpose, supporting health, safety, and well-being in today's learning environments.

## The P360 Design Pathway

- 1 Evaluate the Environment**  
Understand the space—its function, layout, and performance goals.
- 2 Collaborate and Refine**  
Align design intent, material selection, and system performance.
- 3 Specify and Deliver**  
Finalize, fabricate, and bring each wall to life with precision.

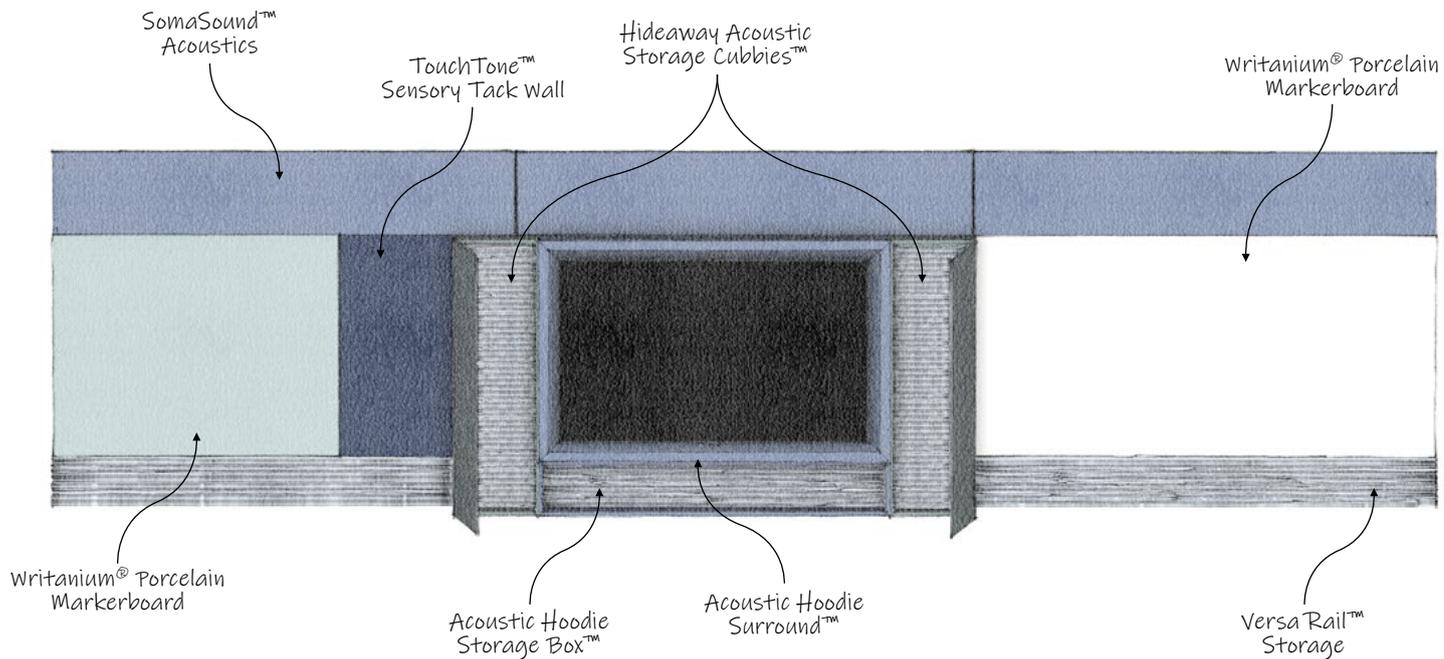

From concept to completion, the P360 Design Pathway ensures that every wall enhances visibility, engagement, and well-being — by design.

## EDTech Wall™

The EDEch Wall™ brings technology directly into the learning space—cleanly and purposefully. It's designed to support everyday instruction, giving students and teachers easy access to digital tools without disrupting the flow of the classroom. By combining durable materials with flexible mounting and cable management, it creates a reliable hub for interactive lessons, presentations, and collaboration.

## Specifications

### P360-EDTech Wall™ System

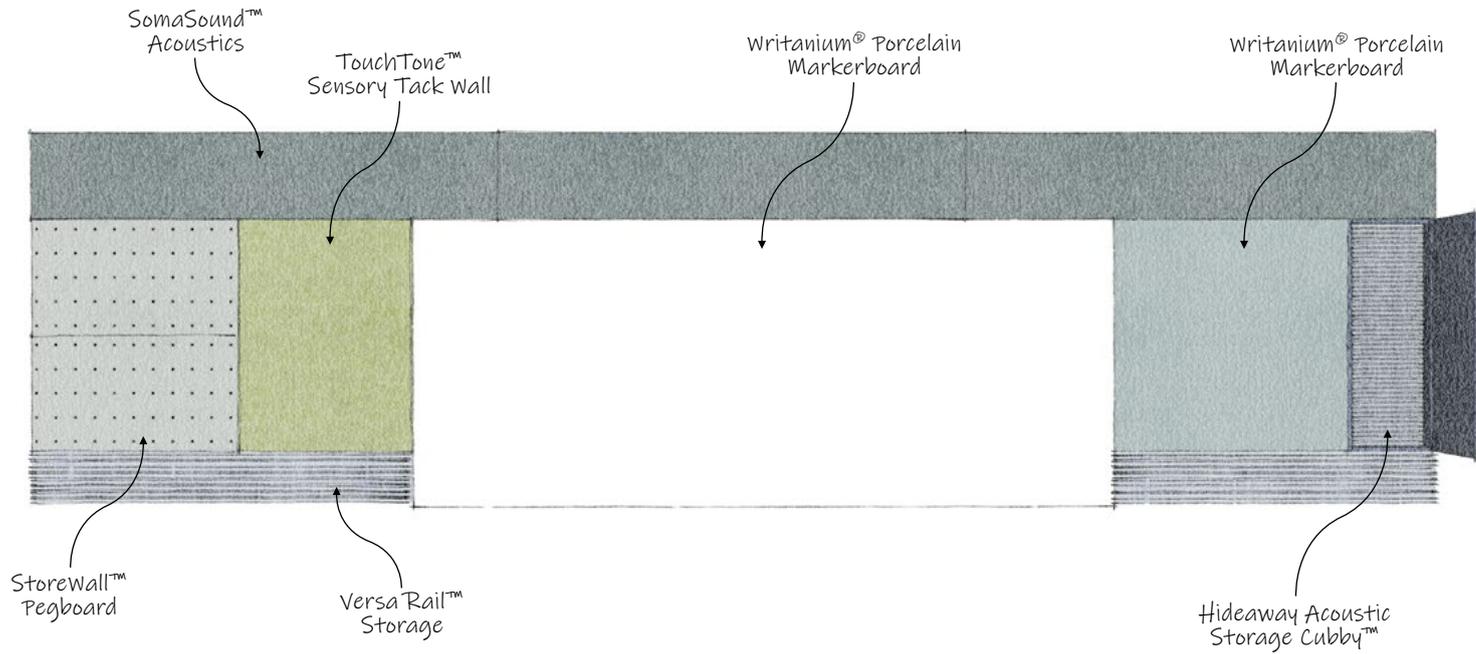

A technology-ready wall system designed to integrate displays, devices, and interactive tools—engineered to support digital learning, collaboration, and presentation in today's classrooms.

## IDEAtion Wall™

The IDEAtion Wall™ creates a central space for collaboration. Writable surfaces give students room to share ideas, sketch concepts, and work through problems together. Built for daily use, it supports creative thinking, critical problem-solving, and group projects—making collaboration a natural part of classroom learning.

## Specifications

### P360-IDEAtion Wall™ System

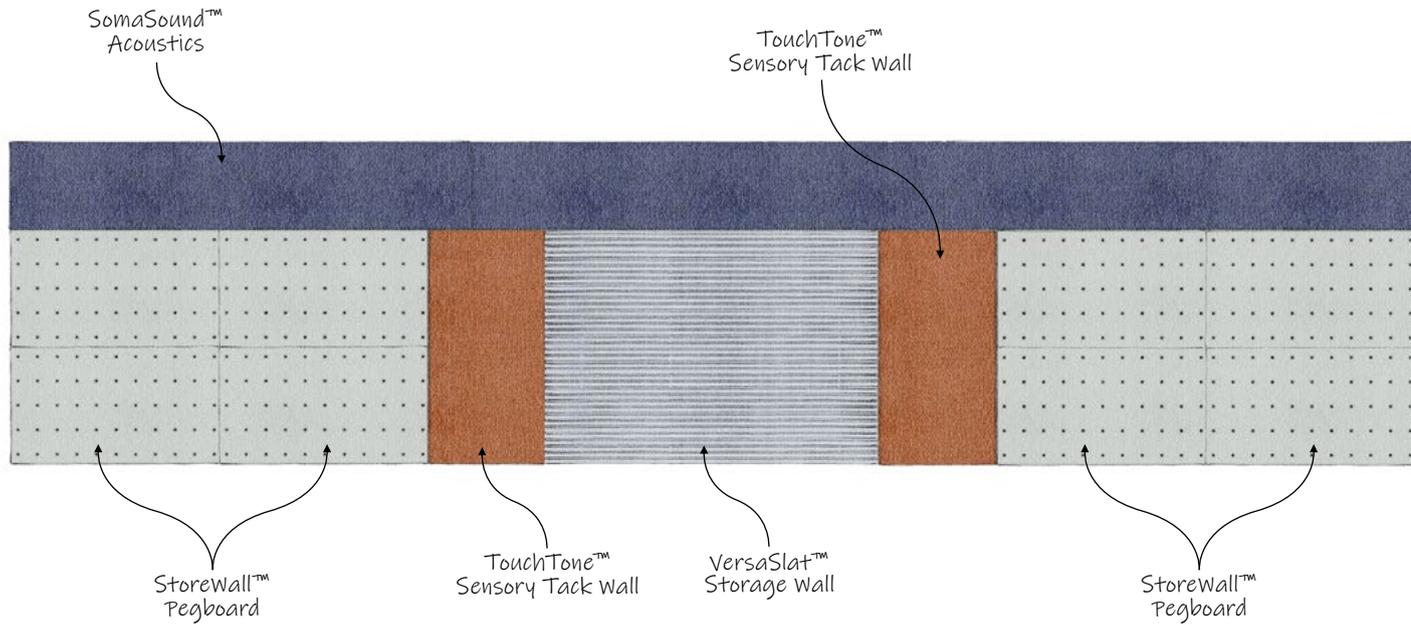

A curated wall system built on a concealed frame and mounting platform—engineered to support the acoustic, sensory, storage, and instructional demands of modern learning environments.

## Jobs Wall™

The Jobs Wall™ is a space-saving storage solution designed for active learning environments. It lifts storage off the floor and onto the wall, reducing clutter and improving access to tools, materials, and resources. Built for STEM, CTE, and maker spaces, it keeps equipment organized and ready for hands-on learning.

## Specifications

### P360-Jobs Wall™ System

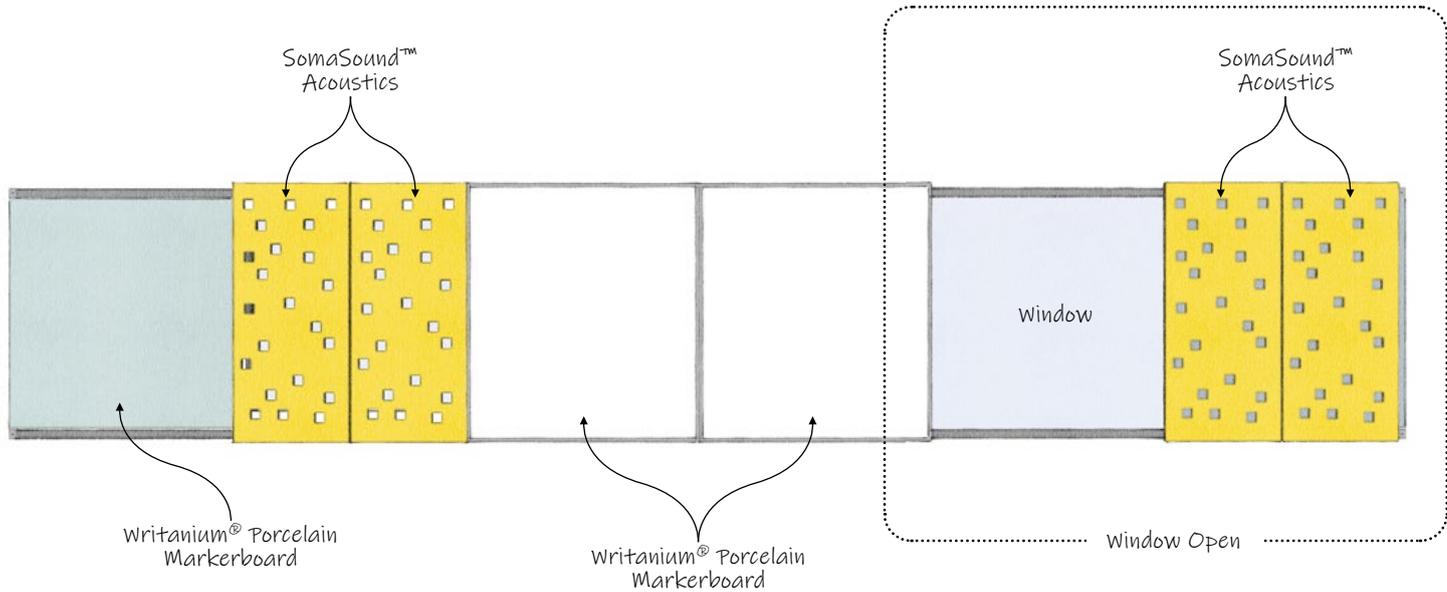

A concealed-frame storage wall with configurable layouts and commercial-grade materials—low-maintenance, classroom-ready, and designed to support CTE, makerspace, specialty rooms, and rolling-cart storage while minimizing fixed casework.

## Window Wall™

The Window Wall™ transforms underused window space into functional learning space. Using our TrackStar™ sliding system, panels glide in front of windows to preserve natural light while adding writable, acoustic, or display surfaces. The system also helps reduce HVAC costs by improving thermal performance and adds a layer of privacy and security—expanding usable square footage and giving classrooms more flexibility without extra construction.

## Specifications

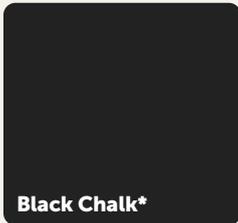

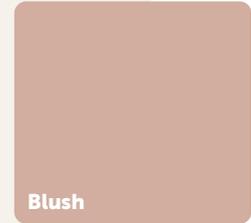

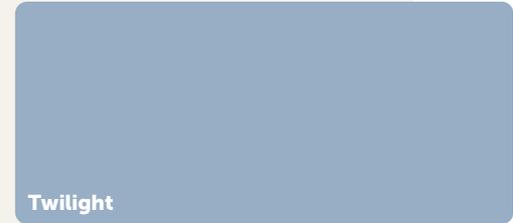

### P360-Window Wall™ System

A reimagined wall system that converts underused window space into a functional learning surface. Sliding panels provide writable, tackable, and acoustic performance while improving energy efficiency, privacy, and security.

Evidence-based

# Materials & Colors

From premium writing surfaces to functional finishes that support collaboration, organization, and acoustic control, each material is curated for its ability to withstand daily use while maintaining its quality and appearance.

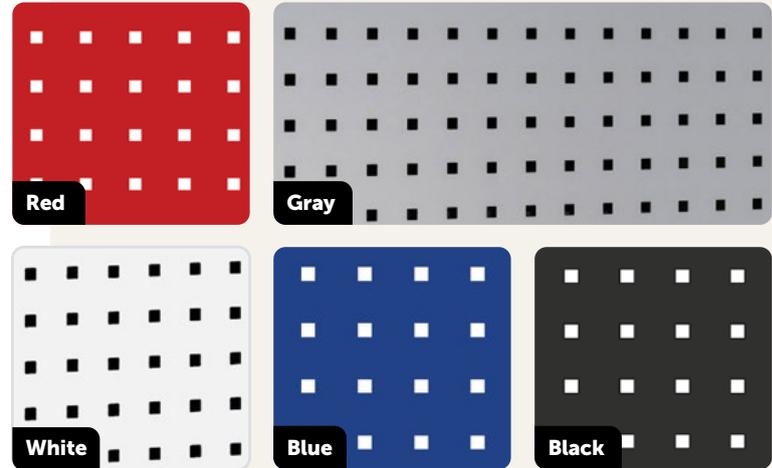

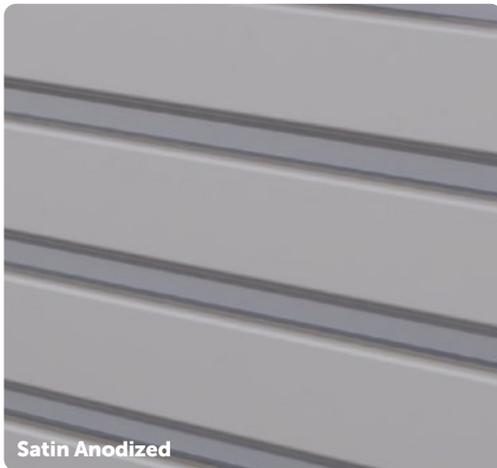

## Writanium® Porcelain Marker and Chalk Surfaces

Trusted by teaching professionals and specified by leading architects and designers nationwide, Writanium® Porcelain outperforms other writing surfaces in every measurable way. Backed by our Forever Warranty™, it's built to last—and offered in a carefully curated, evidence-based color palette designed to enhance learning while standing up to daily use in high-traffic spaces.

\*Available in both chalkboard and markerboard

## VersaSlat™ Storage

A rigid, satin anodized aluminum system with horizontal grooves that accept hooks, shelves, and specialized holders. Designed for strength and versatility, it provides retrievable storage that can handle heavy loads—ideal for backpacks and everyday classroom gear.

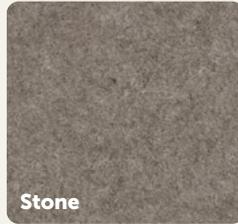

## StoreWall™ Pegboard

A heavy-duty square-hole metal pegboard system designed for CTE, STEM, and other hands-on technical learning spaces. Available in stainless steel and multiple powder-coat colors, it delivers secure, retrievable storage that keeps tools and resources accessible—even in high-activity environments.

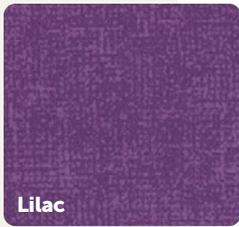

# SomaSound™ Acoustic

High-performance PET acoustic panels deliver excellent sound absorption, reducing echo and reverberation for clearer, more focused learning. Tackable, impact resistant, bacteria resistant, moisture resistant, and easy to install.

## TouchTone™

A soft-to-touch material that engages the senses while doubling as a tackable, acoustic surface—delivering both interactivity and performance in the learning environment.
